SKILLS

Languages: Java, Python, JavaScript, C#, HTML, CSS, XAML

Technologies & Tools: MySQL, SSMS, Firebase, Git, GitHub, Appwrite, Postman, VS Code, IntelliJ IDEA

Frameworks & Libraries: Spring Boot, React.js, .NET Framework, JDBC, Tailwind CSS, REST APIs

Concepts: OOP, Data Structures & Algorithms, DBMS, System Design, Computer Networks

EXPERIENCE

LendingPlate (Unifinz Capital India) | Software Programmer

06/2025 - Present

- Developed and maintained 10+ secure **RESTful APIs** using Java, JPA, and MySQL, reduced average query execution time by **~15-18%** through SQL indexing and query restructuring.
- Boosted financial reporting accuracy by **~20-25%** by implementing validation logic and robust error-handling, eliminating manual reconciliation bottlenecks.
- Addressed critical **VAPT** findings by sanitizing file uploads and resolving host-header vulnerabilities, leading to a substantial reduction in security risks.
- Streamlined the customer communication pipeline through **Voicebot** integration, cutting response and follow-up time by **70%** for the operations team and improving response turnaround.

Optimus Information | Software Development Intern

02/2025 - 05/2025

- Implemented and optimized **15+ SQL queries** for data retrieval and reporting, improving query performance by 20% and reducing average processing time by 3-5 seconds.
- Deployed 3-5 RESTful APIs for seamless data communication between services, reducing data retrieval time by 25% and improving **system reliability by 15%**.
- Constructed responsive UIs using XAML and C# with MVVM architecture, achieving cross-platform deployment and reducing development time by 30%.

PROJECTS

StreamWise: Intelligent Movie Finder [\[Live Demo\]](#)

- Built a fully **responsive web app** using React.js and Tailwind CSS, optimizing state management to reduce page load time by 40% across all device types.
- Configured Firebase Authentication to secure 100% of user sessions, **eliminating unauthorised access** across all application entry points.
- Leveraged **TMDB API** for real-time movie data and **OpenAI GPT API** for personalised AI-driven recommendations, boosting user retention by 35%.

AmbuSaver: Efficient Online Platform for Swift Ambulance Bookings

- Engineered a full-stack ambulance dispatch platform **reducing average emergency booking time** by 60% versus traditional phone-based coordination.
- Integrated real-time **availability tracking** across 10+ hospitals with 100% resource accountability, enabling **3x faster ambulance allocation**.
- Overhauled the user interface for 3 distinct roles (patient, driver, admin), improving accessibility to emergency medical services across all user types.

LEADERSHIP & ACHIEVEMENTS

- Organized Tech Pravah, impacting 500+ students across 3 events via hands-on tech workshops and seminars.
- Led a 4-member Agile team at Hack24 Hackathon, shipping a fully functional emergency service app in under 24 hours and placing among top teams.

EDUCATION

ABES Engineering College, AKTU

2021 - 2025

Bachelor of Technology (B.Tech) in Computer Science and Engineering | CGPA: 8/10

CH. Chhabildass Public School

2020 - 2021

12th CBSE Board | 87%

CERTIFICATIONS

- HackerRank Problem Solving Certificate
- HackerRank Skill Certification in Java
